

問題: The web server does not have permission to save the file C:\...

The screenshot shows the phpMyAdmin web interface in a browser window. The address bar shows the URL `localhost:81/us_opt1/export.php`. The interface is for the 'mini_shop' database. A prominent red error message at the top states: "The web server does not have permission to save the file C:\UniServerZetc\phpmyadmin\mini_shop-db_2018-05-04.sql." Below the error, the main heading is "Exporting tables from 'mini_shop' database".

The interface includes a navigation menu on the left with a tree view showing the database structure: `information_schema`, `mini_shop` (containing `goods`), `mysql`, `performance_schema`, and `phpmyadmin`. The top navigation bar contains tabs for Structure, SQL, Search, Query, Export, Import, Operations, Privileges, Routines, Events, Triggers, Tracking, Designer, and Central columns.

The "Export templates:" section has two columns: "New template:" with a "Template name" input field and a "Create" button; and "Existing templates:" with a "Template:" dropdown menu (currently showing "-- Select a template --"), an "Update" button, and a "Delete" button.

The "Export method:" section has two radio button options: "Quick - display only the minimal options" (which is selected) and "Custom - display all possible options".

The "Format:" section has a dropdown menu currently set to "SQL".

The "Output:" section has two checkboxes: "Save on server in the directory C:\UniServerZetc\phpmyadmin/" (which is unchecked) and "Overwrite existing file(s)" (which is also unchecked). A "Go" button is located below these options.

At the bottom of the interface is a "Console" tab. The Windows taskbar at the very bottom shows various application icons and the system clock indicating 3:41 PM on ENG.

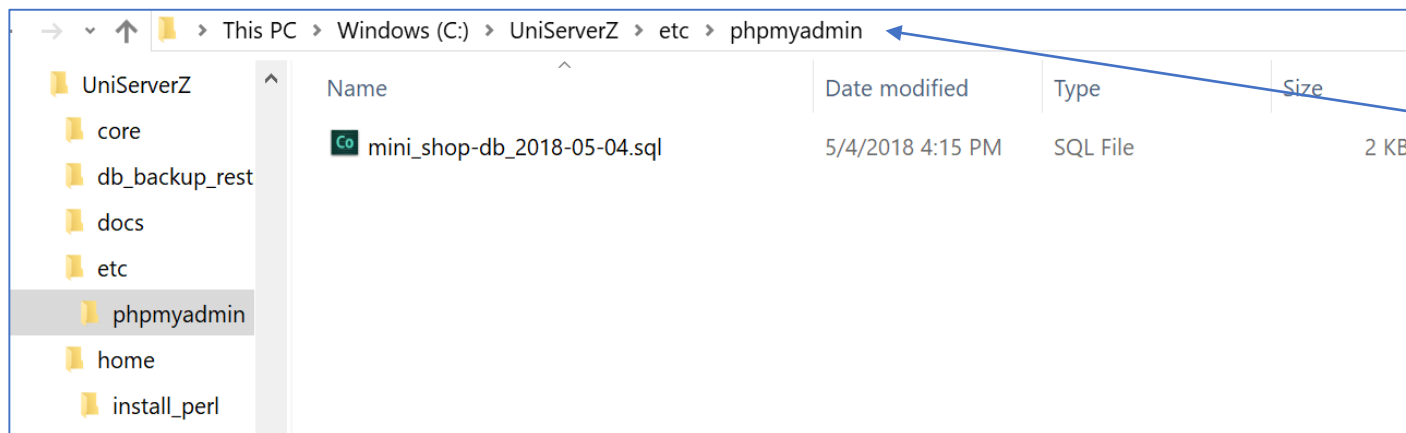

C:\UniServerZ\home\us_opt1\config.inc.php

原來的:

```
/* Webserver upload/save/import directories */  
  
$cfg['UploadDir'] = "$root\\etc\\phpmyadmin"; // Directory for uploaded files  
$cfg['SaveDir'] = "$root\\etc\\phpmyadmin"; // Directory where phpMyAdmin can save e:  
$cfg['docSQLDir'] = "$root\\etc"; // Directory for docSQL imports,  
$cfg['TempDir'] = "$root\\tmp"; // Directory where phpMyAdmin can save tei
```

更新後:

```
/* Webserver upload/save/import directories */  
  
$cfg['UploadDir'] = $root.'\\etc\\phpmyadmin'; // Directory for uploaded files  
$cfg['SaveDir'] = $root.'\\etc\\phpmyadmin'; // Directory where phpMyAdmin can save exported data  
$cfg['docSQLDir'] = $root.'\\etc'; // Directory for docSQL imports,  
$cfg['TempDir'] = $root.'\\tmp'; // Directory where phpMyAdmin can save temporary files.
```

我是download 20180404 時的 ZeroXIII controller, 找不到有etc 這folder, 所以自行新加這 folder在此 (C:\UniServerZ\etc\phpMyAdmin).
